Subject Interagency Group on International Economic Policy (IG-IEP): Paper on Protectionism and the High-Debt LDCs

This summer a working group was formed to analyze the effect of trade restrictions by key industrial countries on the high-debt LDCs. The group has produced the attached paper.

The paper provides useful background information and should facilitate policy discussions on the trade/finance link. We currently are not planning to hold a meeting to discuss the paper, but would do so if members request.
